

Audio Patch Cable

This audio patch cord was designed for use with the LR receiver output to feed TRS type audio inputs such as those on DSLR cameras. Also works with SR Series receivers with the SREXT adapter installed.

The cord is 20 inches long, with a TA3F (mini XLR) on one end and a standard 3.5 mm TRS (stereo) mini plug on the other end. Pin 2 of the TA3 connector feeds the tip and ring connections on the mini plug so both channels of a stereo recorder receive audio.
